

National Farm Safety & Health Week Distracted Driving PSA's

60 Seconds:

If you are traveling on rural roads, keep an eye out for slow moving farm equipment ahead. The gap between you and a slower moving vehicle can close quickly and lead to disaster, especially when distracted. Distracted driving is the leading cause of all traffic crashes. In fact, drivers who use a cell phone are four times more likely to be in a crash than other drivers who aren't using a device. As part of National Farm Safety & Health Week, the National Safety Council reminds you to be alert. No conversation is so important that you put yourself or someone else at risk on the road. Put down the phone and make safe driving your first priority. For more information visit the National Safety Council at W-W-W-DOT-N-S-C-DOT-ORG.

30 Seconds:

The gap between speeding vehicles and slow moving farm equipment can close quickly and lead to disaster, especially when a driver is distracted. Did you know distracted driving is the leading cause of all traffic crashes? Drivers who use a cell phone are four times more likely to be in a crash than other drivers. When on rural roads or any roads, make safe driving your first priority. For more information visit the National Safety Council at W-W-W-DOT-N-S-C-DOT-ORG.
